# GATE150 – GATE300 UBS Valve

## **Product Description**

Gate valves are primarily designed for on-off services. Gate Valves consist of Body, Bonnet, Gate, Stem inside screw & Yoke, rising Stem with Non Rising Hand wheel, Integral seat as standard with options for Renewable Seats. Open & Closed Indicator with lockable Handwheel.

#### **Features**

Gate valves offer positive shutoff with minimal pressure drop; this makes them ideal for controlling liquid or gas flow in various applications. They're also highly effective and easy to maintain due to their robust construction and simple design.

Gate valves are operated manually or by an automated device such as a motor, solenoid, actuator, etc. When the gate is closed, it acts as a barrier and blocks flow. When open, the gate swings away from the seat allowing full flow through the valve. When closed, fluid flow is completely blocked.

WE SPECIALISE IN SAFETY VALVES, REDUCING VALVES, SUSTAINING **VALVES, INDUSTRIAL VALVES, ANCILLARY VALVES & VALVE REPAIRS** 

Technical Data #150/PN32				
Design Standard	MSS SP 80 / BS 5154 / BS EN 12288			
Size	DN15 TO D	DN15 TO DN80		
End Connection	ASME B1.20	ASME B1.20.1		
Face To Face	As Per Mfg.			
Testing	EN 12266-1	EN 12266-1, API 598		
Max pressure:- 19 / 32 BAR	Min Temperature:29°C /-10 TO 66°C		ature:29°C /-10 TO 66°C	
Max pressure:- 7.9 / 14 BAR	Min Temperature:- 260°C		ature:- 260°C	
Testing Pressure (I	Bar G) at Amb	ient Condition	(-29°C to 38°C )	
Shell ( Hydro)	Seat ( Hydro)		Seat ( Air)	
28.5 / 48	21 / 35.2		N/A	
Testing Duration (Sec)				
As Per STD.	As Per STD.		N/A	
Certifications				
Material Test	BS EN 1020	4-3.1
